Academic Achievements

2020-21 was a special year for The White school for it saw us get going and get going with a great start. Welcome to the Annual report of The White School, academic year 2020-21. At the outset we would like to acknowledge with gratitude our parent community, supportive management and committed faculty, our young, exuberant scholars and all those who supported us in this past year.

The highlights of the academic year 2020-21.

With the onset of the Corona pandemic and the realization that classes will have to be given through an online platform, we decided on Google Classrooms as the most compatible one for our teachers and students. Few days of intensive training in Google classrooms made our educators ready to conduct online classes. Our mentors have also undergone more training sessions during the course of the year.

Despite the initial hiccups online schooling went smoothly right through the year with all the activities we could perform online like Tests, celebration of festivals(Onam and Christmas), competitions, and activities. Though the year had its limitations and we had to conduct a number of activities in the online mode, we were able to accomplish the results we were looking at.

A new PTA was constituted for the year 2020 consisting of parents and the academic council members. The members were updated on the activities in the school. An online learning policy was sent out to all the parents and students of the school to abide by the terms and conditions for Online classes. With this kind of situation it was safer to keep the students from any kind of online crime or activity where their security was at stake.

We held our first open house session in June in order to take feedback from our parents about the progress of the online sessions. All other open house sessions were held online to intimate our parents about the progress of their wards entrusted to us. Our testing system continually helps us evaluate the students and in the process helps them to realize their potential. The school staff keeps the academic machinery running smoothly as they coordinate academic and non- academic activities conducted through the year.

Though it was a tough transition from smart boards to keyboards, the faculty at TWS took on the challenge to mentor the students in their care with utmost commitment and determination.

Education shows us the importance of hard work and, at the same time, helps us grow and develop. We are able to shape a better society to live in by understanding and respecting rights, laws, and regulations. Education can stimulate economic growth indirectly, by increasing innovation, productivity, and human capital. Education also has a history of fostering positive social change, by encouraging things like political participation, social equality, and environmental sustainability.

Education is the most empowering force in the world. It creates knowledge, builds confidence, and breaks down barriers to opportunity. For children, it is their key to open the door to a better life. The role of education as an agent or instrument of social change and social development is widely recognized today. Education can initiate social changes by bringing about a change in outlook and attitude of man. It can bring about a change in the pattern of social relationships and thereby it can cause social changes. This is what we as educators are doing...helping to create a generation of critical thinkers and collaborators who can be the stalwarts in the

24/04/2021	WHITEONS DAY	6,7,&8

Innovations

We are proud to say that perhaps we are the only school to offer a plethora of physical activities for the students every day that includes yoga, aerobics and physical training. Our Fit India Freedom Run was indeed a big achievement on our part. Below is the list of activities we conducted through the year.

Our innovative competitions for Onam included vegetable carpet competition and traditional wear competitions.

Art Education- Understanding the importance of art education as mandated by CBSE we have made sure our students did not miss out on art education activities as well. Art integrated learning being infused into the traditional framework of school learning processes. This prepares the child to think critically about various aspects he comes across in his textbooks and relate it to real life situations.

Health and Wellness - Considering the importance of mental health the school ensured that our students have

Overall Results

In spite of the online session students performance was overall good.

PTA Activities

Open house sessions were held every two months to keep us updated on parent feedback as this was the first time we were conducting online sessions. The feedback from parents was always positive and their timely suggestions helped us to make corrections along the way. This ensured that the classes went on smoothly and children were satisfied with the classes.

Important SMC Decisions

Appointment of new staff
Training session for staff
Conducting online workshops for students.
